## 24' Foot Dragster Lifts

New from Stinger are these powder coated steel 24 foot dragster lifts. Each lift is loaded with plenty of storage and safety features. Choose the T288D2 model for transporting 2 dragsters, or choose the T288D1 for transporting a single dragster. Each unit includes a beefy 18 foot lift with 36" extensions placed on each end. Units can be ordered with removeable center inserts, or with no flooring. Optional D-Rings are available on request.

Available in 12 volts or 110 Volts

## 24' Open Top Dragster Lift

T288D2-OT Dragster Lift  
Dual Dragster-Open Top

T288D2-OT Dragster Lift  
Dual Dragster-Open Top

T288D1-OT Open Top  
Single Dragster Lift

This new open top design from Stinger allows the installer to place their own flooring on top of this 24 foot heavy duty tubing frame. This open top design incorporates a single 18 foot frame, coupled with a 36" tapered drive on extension, and a single non tapered 36" extension. Both extensions rest outside the upright columns, and are welded to the crossbars for a strong and sturdy foundation. We have included all the structure necessary for a safe, and secure storage platform. The open top design can be purchased with the outer wings to store two dragsters PN# T288D2-OT, or as a Standard Dragster lift T288D1-OT for storing a single dragster.

Included with every open top dragster lift are 5 pieces of tubing that lay between the ramps for a sturdy center support foundation.

Center Support

All Stinger Trailer lifts come with a 12 volt power supply. Optional 110 Volts are available

12V w/ Cord

110V w/o
